

Mental Health Manager Manchester Pre School-Head Start

The role of the Mental Health Manager for Manchester Pre School (HS) is very diversified. Working closely with the Family Advocates is an important part of developing a strong and consistent partnership with the families of all of our children.

Currently the Family Advocates are working on developing a Family Partnership Assessment Packet to help support and engage families throughout the year. This process will help to identify the strengths of the family, address any challenges the family may have as well as identify any goals the family may desire to work towards. Resources and varied supports are also provided to the family should they choose. This process will begin during the first few weeks of school in the fall and will continue throughout the school year.
